📄 SUMMARY

Software Engineer with a strong foundation in modern web architecture, responsive UI design, and full-lifecycle application development. Skilled in building scalable digital products, integrating APIs, and rapidly adapting to new technology stacks. Proficient in JavaScript/TypeScript ecosystems, React.js, and backend integration, with a focus on writing clean, maintainable code

🎓 EDUCATION

B.S in Engineering, Minia University - Major : computer & systems

2022 – 2026 | Minia, Egypt

Grade: very Good (77.74%)

🌐 LANGUAGES

- Arabic
- English

🧠 SKILLS

Adaptability

Fast learning curve for new frameworks, languages, and hardware interfaces

Problem-Solving

Root cause analysis, system troubleshooting, optimization

Team Collaboration

Cross-functional teamwork, paired programming, repository coordination

Time Management

Breaking large features down into manageable tasks, estimating effort accurately, and focusing on high-impact deliverables first.

📚 COURSES

Full-Stack Web Development

Covered foundational web technologies including HTML, CSS, JavaScript, PHP, and MySQL database management.

Data Analysis Using Excel

Covered how to analyze data using the excel program and how to employ equations in excel tables.

Cyber Security Attack Techniques

Getting to know the Kali Linux system and the most important tools used in it.

Database Fundamental

covers the core concepts, design principles, and query tools needed to store, organize, and retrieve data efficiently.

🔧 TECHNICAL SKILLS

Programming Languages

JavaScript, HTML5, CSS, Python, PHP, C, C++

Web & Frameworks

React.js, Tailwind CSS

Developer Tools

Git, GitHub, Docker

📁 PROJECTS

NEFEX 🔗

is a web-based governance and performance-measurement platform developed to replace the paper-based quality-assurance and institutional-governance processes currently used at Minia University's Faculty of Engineering,

Portfolio 🔗

A fully integrated and responsive personal website built using React, Tailwind CSS and Glassmorphism effects, supporting seamless switching between night and day mode and full support for Arabic and English languages.

Al-Mahfza 🔗

A responsive, conversion-focused fintech landing page for digital remittance built using React, Next.js, TypeScript, and Tailwind CSS, featuring mobile-first interactive payment and security flows backed by a clean, data-driven reusable component architecture.
